be.ENERGISED certified and compatible charging stations

Our main goal is the trouble-free and efficient operation of connected charging stations. To ensure a positive charging experience we, as a hardware neutral software solutions provider, do not only set high quality standards for ourselves, but also for our hardware partners.
When it comes to the quality of connection and communication between be.ENERGISED and charging systems, or supported features of charging systems, we distinguish between "certified" and "compatible" products.
Certified products are characterized by the successful completion of our certification progress, which means that every requirement of be.ENERGISED has been met. Compatible products can also be connected to be.ENERGISED, but there is the chance that some functionalities will not be available by operating with be.ENERGISED.
